1625

DATE MAILED: 10/28/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

| | | | |
|------------------------------|---------------------------------|--------------------------------|--|
| Office Action Summary | Application No. 10/743,950 | Applicant(s) DASSEUX ET AL. | |
| | Examiner Charanjit S. Aulakh | Art Unit 1625 | |

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 22 September 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-3,5,7-9,13,14,19 and 34-57 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☒ Claim(s) 35 is/are allowed.
- 6) ☒ Claim(s) 1,5,8,9,34 and 36-57 is/are rejected.
- 7) ☒ Claim(s) 2,3,7,13,14 and 19 is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

1. According to paper filed on Sep. 22, 2005, the applicants have canceled claims 4, 6, 10-12, 15-18 and 20-33 and furthermore, have amended claims 1-3, 5, 9, 19, 34 and 36-57.

2. Applicant's election of group I in paper filed on Sep. 22, 2005 is acknowledged.

Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse; see MPEP 818.03(a).

3. Claims 1-3, 5, 7-9, 13, 14, 19 and 34-57 are now pending in the application.

Claim Rejections - 35 USC § 112

Claim Rejections - 35 USC § 112

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claims 36-57 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for treating atherosclerosis, does not reasonably provide enablement for treating or preventing all other disorders mentioned in claims 36-57. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to use the invention commensurate in scope with these claims. The following eight different factors (see *Ex parte Foreman*, 230 USPQ at 547; *Wands, In re*, 858.F.2d 731, 8 USPQ 2d 1400, Fed. Cir. 1988) must be considered in order for the specification to be enabling for what is being claimed:

Art Unit: 1625

Quantity of experimentation necessary, the amount of direction or guidance provided, presence or absence of working examples, the nature of the invention, the state of the prior art, the relative skill of those in the art, the predictability or unpredictability and the breadth of claims. In the instant case, the specification is not enabling based on at least four of the above mentioned eight different factors such as quantity of experimentation necessary, the amount of direction or guidance provided, presence of working examples, the state of the prior art and the breadth of claims.

The instant compounds are shown to reduce VLDL cholesterol, LDL cholesterol and increase HDL cholesterol. Based on these teachings, the instant compounds will have utility in treating disease conditions where high cholesterol levels are implicated in their etiology such as atherosclerosis. There is no teaching or guidance in the specification how the instant compounds having cholesterol lowering effect will have utility in treating and/or preventing every known cardiovascular disease, disorder of glucose metabolism, Alzheimer disease. Syndrome X, septicemia, thrombotic disorder, peroxisome proliferators activated receptor associated disorder, obesity, pancreatitis, hypertension, renal disease, cancer, inflammation, impotence, neurodegenerative diseases, metabolic syndrome disorders etc. There is no teaching in the prior art that compounds having cholesterol lowering effect are well known to have therapeutic utility in treating and/or preventing every known cardiovascular disease, disorder of glucose metabolism, Alzheimer disease. Syndrome X, septicemia, thrombotic disorder, peroxisome proliferators activated receptor associated disorder, obesity, pancreatitis, hypertension, renal disease, cancer, inflammation, impotence, neurodegenerative diseases, metabolic

Art Unit: 1625

syndrome disorders etc. There are no working examples present showing efficacy of instant compounds in known animal models of every known cardiovascular disease, disorder of glucose metabolism, Alzheimer disease. Syndrome X, septicemia, thrombotic disorder, peroxisome proliferators activated receptor associated disorder, obesity, pancreatitis, hypertension, renal disease, cancer, inflammation, impotence, neurodegenerative diseases, metabolic syndrome disorders etc. It is well known in the prior art that there are multiple mechanisms involved in the etiology of any disease condition and therefore, correcting only one mechanism will not prevent (completely cure) that disease condition. The instant compounds of formula 1 encompasses several hundreds of thousands of compounds based on the values of variables W1, W2, Z, G, m and x and therefore, in absence of such teachings, guidance and presence of working examples, it would require undue experimentation to demonstrate the efficacy of instant compounds in known animal models of every known cardiovascular disease, disorder of glucose metabolism, Alzheimer disease. Syndrome X, septicemia, thrombotic disorder, peroxisome proliferators activated receptor associated disorder, obesity, pancreatitis, hypertension, renal disease, cancer, inflammation, impotence, neurodegenerative diseases, metabolic syndrome disorders etc and hence their utility for treating these disorders.

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 1625

7. Claims 9, 34 and 36-57 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 9, last line, W1 is shown to represent $\text{-CCl}_2\text{CO}_2\text{CH}_3\text{-}$. However, according to the definition of variable w1 which represents L and L is $\text{C(R}_1\text{)(R}_2\text{)-(CH}_2\text{)}_n\text{-Y}$, R1 and R2 can not represent a halogen. An appropriate correction is required.

Claims 34 and 36-57 depend upon canceled claim 15.

Claim 56 depends upon canceled claims 15, 18, 20, 21, 26 or 30.

In claims 36-57, the terms ----preventing or inhibiting ---- are indefinite since the degree of prevention or inhibition (such as 20%, 40%, 60%, 80% or 100%) is not defined and furthermore, how this prevention or inhibition is being assessed following in vivo administration of instant compounds?

In claim 36, the term ---cardiovascular disease--- is indefinite since specific diseases are not defined.

In claim 37, the term ---dyslipidemia --- is indefinite since it is not clear what types of lipids are elevated or reduced in a patient?

In claim 38, the term ---dyslipoproteinemia --- is indefinite since it is not clear what types of lipoproteins are elevated or reduced in a patient?

In claim 39, the term ---disorder of glucose metabolism---- is indefinite since specific disorders are not defined.

In claim 41, the term – syndrome X---- is indefinite since specific disorders are not defined.

Art Unit: 1625

In claim 43, the term – thrombotic disorder---- is indefinite since specific disorders are not defined.

In claim 44, the term – peroxisome proliferator activated receptor associated disorder---- is indefinite since specific disorders are not defined.

In claim 48, the term – renal disease---- is indefinite since specific diseases are not defined.

In claim 49, the term – cancer---- is indefinite since specific cancers are not defined.

In claim 50, the term – inflammation---- is indefinite since it is not clear what part of the body or tissue etc.is inflamed?

In claim 52, the term – neurodegenerative disease---- is indefinite since specific diseases are not defined.

In claims 53 and 54, the terms – fatty acid synthesis and sterol synthesis---- are indefinite since specific fatty acids and sterols are not defined and furthermore, what is the outcome of this inhibition? What is being treated?

In claim 55, the term –metabolic syndrome disorders---- is indefinite since specific disorders are not defined.

In claims 56 and 57, It is not clear which diseases are treatable by increasing HDL levels or lowering LDL levels since specific diseases are not defined.

Claim Rejections - 35 USC § 102

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

8. Claims 1, 5, 8, 34, 39 and 55 are rejected under 35 U.S.C. 102(b) as being anticipated by Voss (WO 96/11901).

Art Unit: 1625

Voss discloses tetrachlorodicarboxylic acid compounds as antidiabetic agents. The compound disclosed in example 6 (RN 177429-71-9, see page 9) by Voss anticipates the instant claims when W1 and W2 represent $-C(R1)(R2)-(CH_2)_c-C(R3)(R4)-Y$ and Y represents $-COOH$ group in the instant compounds of formula 1.

Allowable Subject Matter

9. Claims 2, 3, 7, 13, 14 and 19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

10. Claim 35 is allowed.

11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Charanjit S. Aulakh whose telephone number is (571)272-0678. The examiner can normally be reached on Monday through Friday, 8:30 A.M. to 5:00 P.M..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Cecilia Tsang can be reached on (571)272-0562. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
